AUTOMATIC AUGER FILLER 200A

Auger powder filler is used for filling fluidic or low-fluidity powder materials like coffee powder, agriculture pesticide, granular additive, etc. It is widely used in the various industries including pharmaceutical, foodstuff, cosmetic and chemical.

Features

- Stainless steel structure.
- PLC Control system.
- Up to 10 sets of operation parameter can be stored.
- Servo motor drive screw with up to 99% filling precision.
- No bottle no fill.
- Conveyor is included..

Specification

- Model: 200A
- Filling weight: up to 5kg by replace different size of augers.
- Hopper volume: 35L
- Filling speed: 15-40 bottles/min.depends on the filling volume.
- Voltage: 380V 3phase or 220v 3phase optional.
- Weight: 350kg.

Features

- Stainless steel structure.
- PLC control system accessed through an easy-to-use touch screen with weight module controller.
- Up to 10 sets of operation parameter can be stored.
- Servo motor drive screw with up to 99% filling precision.
- Includes hand wheel of Height adjustment.
- No bottle no fill.

It can be used for filling from very thin powder to granule powder by replacing auger parts.
