

URBAN OUTSOURCING

TABLE TOP 4 WHEEL CAPPING MACHINE

Our bench-top 4 wheel capper is suitable for common round caps, trigger caps, duckbill caps, pumps, spray caps, and screw-on caps.

The reliability, ease of operation and change-over procedure, and flexibility of installation are the most important advantages of the capping machine.

Few parts need to be changed and very simple when needed for different size caps or bottles.

Digital torque adjustment

Both manual (pedal) and auto function.

Cap diameter: 25 - 60mm.

Running speed: Up to 30 bottles per minute.

Torque: 0.5 - 5N.

Compressed air: 0.4 - 0.6Mpa.

Voltage: AC110-240V 1 phase 50/60Hz.

Power: 500W.

Dimensions: L550*W400*H600mm.

Weight: 50kg.
