PL501 INLINE LABELING MACHINE

INTRODUCTIONS:

Clear cut and rugged design is evident in the popular PL-501 wrap labelling system. The real beauty shows up in the performance results of your labelled products.

Separate drives for conveyor, wrap around and space creator are useful for precise labelling in case of multi-product with different label size.

FEATURE:

- "No container, no labelling" function or choice of "missing label on label roll" and "missing label on container" function.
- Modular structure reduces down time with quick change over and flexibility in settings like printing position and dispensing position.
- Independent drives for space creator & wrap around enhance handling of multi- product with different label lengths more effectively.
- Lowering -lifting device for wrap around and dispenser gives flexibility for label positioning.
- PLC based control panel with Delta colour touch screen.
- Virtually tool-less operation with low maintenance.
- Compact design
- Installation of a wide range of hot foil printing units and barcode readers
- User-friendly operator panel with E-stop in the machine front
- Easy application in-line with packaging machines and up or downstream rotating accumulating tables or turn tables.

SPECIFICATIONS: Model

Voltage	PL-501 220/110 VAC 50/60 Hz Single Phase
Power	760 VA
Applicator Height	150 mm
Label Size	H:150 mm x L:300 mm Max.
Conveyor Width	100 mm
Conveyor Speed	5~23 m/min.
Dispensing Speed	40 m/min. Max
Dispense Driver	Stepper Motor
Label inner core Diameter	76 mm
Dimensions	2004mm(L) X 1052 mm (W) X 1043mm (H)
Maximum Bottle Diameter	100 mm
Net Weight	Approx. 150 KGS
