TABLE TOP GEAR FILLING MACHINE

FEATURES:

- The Digi-fill uses a gear pump system as a measuring device to fill the correct amount of liquids into containers.
- The volume, speed and delay time can be adjusted for each fill.
- Each fill can be controlled by starting slow or finishing slow enabling the operator to reduce the amount of foam generated or reduce splashing of the product.
- Human interface is achieved using a combined keypad and LCD display configuration.
- 20 pre-set container volumes can be loaded for easy changeover.
- Pump unit easily dismantled for cleaning purposes.
- Machine is able to be connected to conveyor line for automatic filling operation.
- Machine can be operated in auto or manual start/ stop mode

TECHNICAL PARAMETERS:

- Volume :10ml- 11 000ml
- Accuracy:0.5%-1%
- Filling speed:100ml-24 Bpm, 300ml-16 Bpm ,1000ml-10 Bpm
- Power requirement: 220v,50-60Hz,400W
- Machine size:310mm x 480mm x 310mm
- Net weight:18kg
