AUTO TUBE FILLING AND SEALING MACHINES

Our automatic tube filler sealer is suitable for filling all kinds of semi-viscous and viscous products into plastic and compound tubes. It's suitable for pharmaceutical, chemical, cosmetic, and food products. Run for round tubes, as well as the oval tubes.

URBAN HS300A TUBE MACHINE

Works for plastic and compound tubes, or metal tubes.

Tube feeding, marking identification, filling, folding, sealing, code printing and finished product output all conducted by a fully auto control system. Tube washing and feeding conducted pneumatically, accurate and reliable.

Material contact parts 316L stainless steel.

Pneumatic shut-off nozzle, no drippings after filling, No tube no filling feature and Overload protection.

A 40L 316L stainless steel hopper is included dynamically built to meet the cGMP standard.

Material Feeding Pump, Hopper stirrer, Hopper heater, and Tube Feeding machine are optional.

Run for both round and oval tubes, suitable for common sealing end or special space sealing end.

SPECIFICATIONS

Filling volume: 5 -250ml.

Filling accuracy: $\leq \pm 1\%$.

Tube diameter: 10 - 50mm.

Tube height: Max. 210mm.

Hopper volume: 40L.

Running speed: Up to **80 tubes per minute**.

Available Extras

Material Feeding Pump, Hopper Stirrer, Hopper Heater and Tube Filling Machine are optional.

For slower speed machine, please see model MS100A
